Hi Don,

Hopefully you've seen the request I've forwarded to our Street Maintenance Division Manager, who has oversight of all of BSS's yards city-wide. We'll see what he can dig up and hope for the best.

If you're interested in purchasing additional receptacles, I believe I've found a company that manufactures the same or similar trash receptacle. See the attached scanned images from the Victor Stanley catalog. I believe the model that is similar to the ones shown in your picture is their "HF 316" model, which is a 32 gallon receptacle that's surrounded by 16 2" x 4" slats.

I'll forward any info I receive from our St Maint. Division personnel to you as soon as I hear back from them.

Have a good weekend!

Here are a couple of photos of the trash receptacles we're looking for. The slats are wood (or plastic wood). We've re-painted and repaired these old receptacles that were originally provided by the City and used along Sepulveda. I'd like to find any number of them and have immediate spaces for 4 or 5. Thanks for any help you can provide.
